Welcome

Thank you for choosing Yeastar S412 IP PBX. Yeastar S412 is a stand-alone telephone system offering an unrivalled range of features to small business. It supports various combinations of telephony ports including FXS, PSTN, ISDN BRI, and GSM/3G/4G.

This guide describes how to install the S412 and how to log in the web GUI to configure the system. Once you complete the installation, refer to the *Yeastar S-Series Administrator Guide* for instructions on how to perform configurations on the system.

Related Documents

This Installation Guide only explains the installation of Yeastar S412 IPPBX. For more functionality and advanced settings, please refer to the relative documents as below:

Document	Description
Yeastar S-Series Datasheet	Datasheet for the Yeastar S-Series IPPBX.
Yeastar S-Series Administrator Guide	The administrator could refer to this manual for instructions on how to configure, operate, monitor, and maintain the Yeastar S412 IPPBX.

Package Contents

1* S412 PBX	1* Power Adapter	1* Network Cable
4* Rubber Feet	1* Warranty Card	1* Quick Installation Guide

Hardware Overview

LED Indicators and Ports

LED Indicators

LED	Indication	Status	Description
POWER Power status	On	The power is switched on	
	Off	The power is switched off	
System System status	System status	Blinking	The system is running properly
	Static/Off	The system goes wrong	
WAN WAN status		Static	Linked normally.
	WAN status	Blinking	In communication.
		Off	Off-line.
	Static	Linked normally.	
LAN	LAN status	Blinking	In communication.
		Off	Off-line.
FXS Port Status	FXS	Green light	Static: The port is idle.Blinking: There is an ongoing call on the port.
	GSM/3G/4G	Red light	 Static: the trunk is idle. Blinking slowly: there is no SIM card inserted. Blinking rapidly: the trunk is in use.
Line Status	BRI	Orange light	 Blinking slowly: the BRI line is disconnected. Static: the BRI line is connected or in use.
	FXO	Red light	 Blinking slowly: no PSTN line is connected to the port. Static: the PSTN line is idle. Blinking rapidly: the PSTN line is busy.

Port Description

Ports	Description
Line Port	FXO port (red light): for the connection of PSTN lines or FXS ports of traditional PBX. BRI port (orange light): for the connection of ISDN BRI lines. Note: the sequence number of the ports corresponds to that of the Indicator lights in the front panel. (I.e. the LED lights in the front indicate the connection status of the corresponding ports at the front panel.)
FXS Port	For the connection of analog phones
ANT	Rotate the antenna into the Antenna Socket.

TF Slot	Insert TF card.
Ethernet Port	 Yeastar S412 provides two 10/100M adaptive RJ45 Ethernet ports. There are 3 Ethernet modes for the system. The default mode is "Single". Single: LAN port interface will be used for uplink connection. WAN port is disabled. Bridge: LAN port interface will be used for uplink connection. WAN port interface will be used as bridge for PC connection.
	 Dual: both ports can be used for uplink connection.
Reset Button	Press and hold for 10 seconds to restore the factory defaults.
Power Inlet	Connect the supplied power supply to the port.

Installation

This chapter shows you how to install Yeastar S412 IP phone system.

Safety Disclaimers and Installation Warnings

To avoid unexpected accident, personal injury or device damage, please read the safety disclaimers and installation warnings.

Power

- Use only the power adapter provided with the IP PBX.
- Keep the power off during the installation.
- Make sure that the supply voltage matches the specifications indicated on the back panel of the device.
- To avoid the electric accident, do not open or remove the cover of IP PBX when it is working as well as off the power.
- Before cleaning the device, cut off the power supply.

Environment

Install the Yeastar S412 IP PBX in a location that is clean, free from vibration, electric shock, and temperature/humidity extremes. The operating temperature should be kept below 104°F (40°C).

Module Installation

Yeastar S412 is designed with 8 fixed on-board FXS ports and 4 reserved slots to insert different modules according to your requirement. Yeastar S412 supports installing up to 2 modules. The optional modules are as below:

- S2 Module
- O2 Module

B2 Module

- GSM Module
- 3G Module (WCDMA Module)
- 4G Module (LTE Module)

Unpack S412, you can see the S412 main board as the following picture.

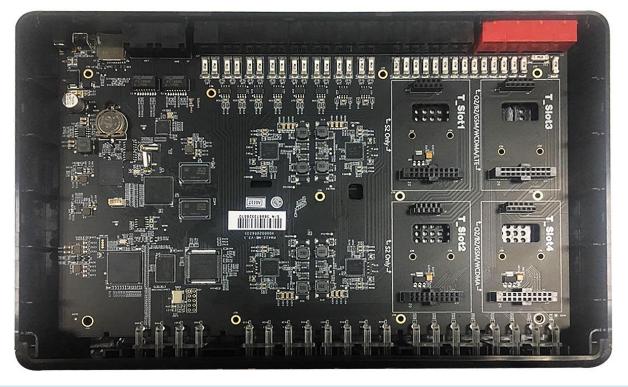

- T Slot1: for S2 module only.
- T Slot2: for S2 module only.
- T_Slot3: for O2 module, B2 module, GSM module, 3G module, 4G module.
- T Slot4: for O2 module, B2 module, GSM module, 3G module.

NOTE

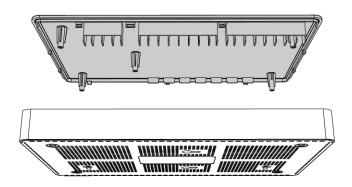

- Before installing the module, please check if the module is clean and intact.
- You need to install the 4G LTE module into T Slot3 if you want to use 4G cellular network.

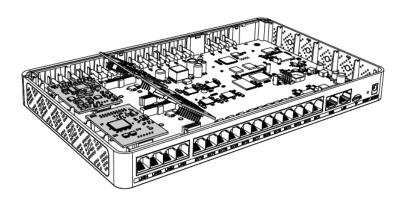

S412 Main Board

STEP 1 Loosen the screws on the bottom of the device and remove the upper cover.

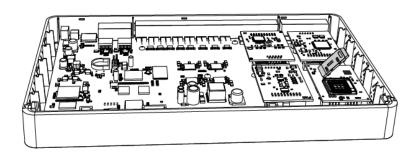

STEP 2 Insert the module to the Module Slot.

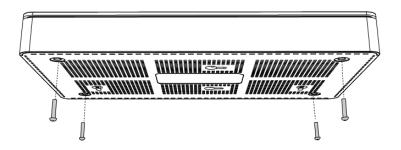

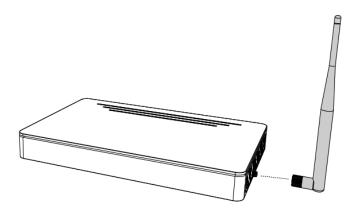

STEP 3 Insert a SIM card on the GSM/3G/4G module following the instructions. Skip this step if no GSM/3G/4G module installed.

STEP 4 Close the cover and fix the screws.

STEP 5 Rotate the antenna into the Antenna Socket. Skip this step if no GSM/3G/4G module installed.

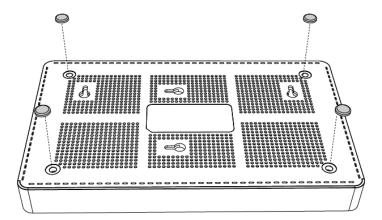

Desktop Installation

WARNING

- Please set 5~10cm gaps around the device for air circulation.
- Please avoid any heavy thing placed on the device.
- **STEP 1** Place the IP PBX on a steady platform.
- **STEP 2** Remove the adhesive backing paper from the rubber feet.
- **STEP 3** Turn over the device and attach the supplied rubber feet to the recessed areas on the bottom at each corner of the device.

Connecting the Equipment

- **STEP 1** Connect one end of a network cable to the LAN port of Yeastar S412, and the other end to any port of your company's LAN switch/router.
- **STEP 2** Plug the provided power adapter into the power jack on S412 and the other end to a standard electrical wall socket. Wait for the system to boot up till the SYSTEM LED starts to blink.
- **STEP 3** Connect the telephony line to the RJ11 port of the IP PBX.

RJ11 Port	Description
FXS	Connect one end of a RJ11 phone cable to the port. Connect the other end to
ΓΛΟ	the analog phone or fax machine.
FXO	Connect an RJ11 cable to the FXO port. Connect the other end of the cable to a
FAU	PSTN line.
DDI	Connect the cable provided by the ISDN BRI provider to the BRI port. Connect
BRI	the other end of the cable to the ISDN provider equipment.

NOTE

Connect BRI/PSTN/analog phone/fax machine to the corresponding port based on the color of port indicator.

Getting Started with the Configuration

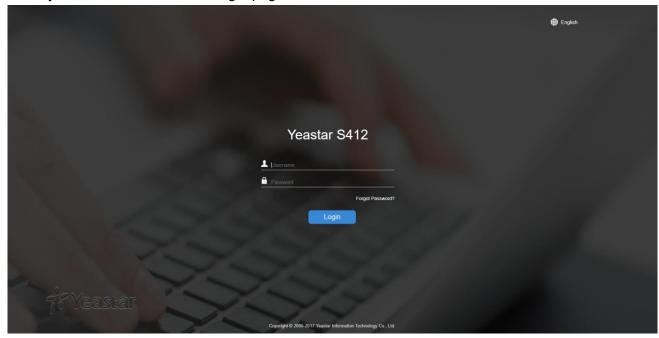

Yeastar S412 IP Phone System provides web-based configuration interface for administrator. The administrator can manage the device by logging in the Web interface.

Access path: https://192.168.5.150:8088

User Name: adminPassword: password

STEP 1 Connect your PC to the same network as Yeastar S412.

STEP 2 Start the browser on PC. In the address bar, enter the IP address, click "Enter" key and then you can see the web GUI login page shows as below.

STEP 3 For the detailed configurations of extensions, trunks and other system settings, please refer to the manual *Yeastar S-Series Administrator Manual*.

NOTE

After saving the changes, remember to click the "Apply" button at the top-right corner to make the changes take effect.
